## List of Figures

# 1   Intro

Hello, this is a simple test of captions with plots in knitr.
Now onto the graphing.

# 2   First Graph

Figure 1 manually calls the figure environment.
Here is the code for doing so.

```
qplot(1:10, 1:10)
```

How does that look?

# 3   Second Graph
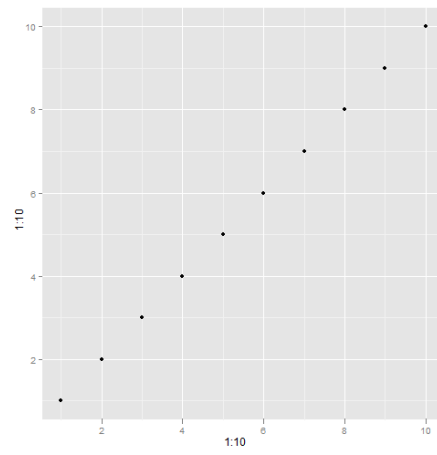

Here we will let `knitr` do it. This is seen in Figure 2.

Figure 1: Using manual figure environment
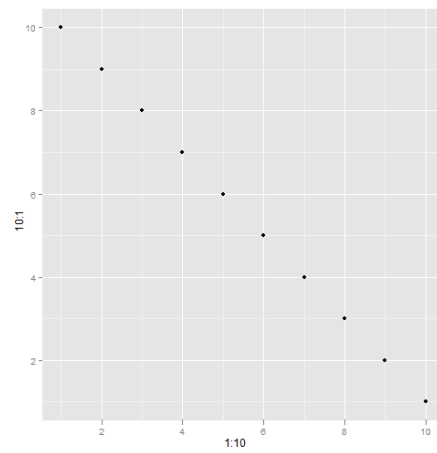

```
qplot(1:10, 10:1)
```

Figure 2: Using knitr, which is awesome, to create the figure environment.

Hopefully that looks nice.
